COMPLETE EMAIL  
MANAGEMENT SOLUTION

## ARCMail DEFENDER

### YOUR EMAIL ARCHIVING AND MANAGEMENT SOLUTION

ArcMail has an affordable, standalone solution that includes everything you need to manage your archive. Your ArcMail Defender automatically captures, indexes, stores, and quickly finds and recovers all email, including attachments.

The Defender appliance comes complete with on-board, fault-tolerant storage ranging from 500GB to 16TB\* with data compression and hardware RAID capability for secure and efficient disk utilization—a true plug and play solution. All necessary firmware—data compression, disk management and Linux OS—is embedded. There's no additional hardware or software to add, integrate or maintain, and no painful software licensing or offsite storage fees.

\*Larger, customizable sizes available.

# UNLEASH THE POWER OF ARCMail DEFENDER

WHETHER YOU NEED AN EMAIL ARCHIVING SOLUTION  
FOR 5 USERS OR 50,000...

## ARCMail HAS THE ANSWER.

**Secure, automatic archiving protects business-critical data and ensures regulatory compliance.**

- Automatic capture and storage of all inbound, outbound and internal e-mail attachments
- Single instance storage for all internal mail
- Restore function for disaster recovery
- Individual emails can be viewed and restored but cannot be altered or deleted
- Data integrity encryption for Backup and Restore to ensure that restored data has not been altered
- Implementation of SSL certification process enhances security of archived email
- Multiple retention periods
- Legal hold

**Fast, easy search and restore.**

- Search on Sender, Recipient, Subject, Dates, Attachment names and file type
- Full text search on both email and attachment text
- Regular and wildcard search functions
- View and open attachments, and restore emails to a separate mail box
- Option to view header information

**Friendly to users, popular with administrators.**

- Users launch the Web-based interface directly from Outlook or their web browser, at the desktop or remotely, for Search, Restore, and administrative functions
- Import function lets you add past emails and Export allows for easy consolidation and distribution of restored emails
- Schedulable full and incremental backup capabilities
- Compatible with MS Exchange® and mail servers with SMTP journaling functionality, and with MS Active Directory®
- Onboard storage for up to 80 million emails keeps old mail off the mail server, improves performance and reduces back-up time
- Easy setup and administration
- Tiered access
