

CLOUD POWER: SOLUTION PARTNER

Get cloud power on *your* terms

What if you could take your existing IT infrastructure and make it more flexible, more productive, and more powerful—all for less money than you're currently spending?

Introducing cloud power from Microsoft, the most comprehensive approach to cloud computing on earth—delivering *software as a service* (SaaS), *platform as a service* (PaaS), and *infrastructure as a service* (IaaS) solutions across multiple environments using familiar tools and technology.

Increase business productivity while paying only for the computing power you need with Microsoft Office 365. Take advantage of flexible, public cloud computing with Windows Azure® platform application development and hosting solutions. Reduce capital expenses while creating a more scalable and efficient private cloud infrastructure using Windows Server® 2008 R2 Hyper-V™. When you choose cloud solutions based on Microsoft technologies, you gain the flexibility and control to distribute cloud power where it makes sense for your organization while leveraging the same Microsoft best in-class products you already know and trust.

IT Solutions, Inc is your cloud authority.

Our unique services and solutions will help you get the most out of Microsoft cloud products. Learn more at www.microsoft.com/cloud or find out more about these Microsoft products:
