

IT Solutions, Inc.

Solutions That Connect

Networking Services

Do you need help getting started on a major network project? Do you have network issues, but you aren't sure how to identify the problems? What keeps you up at night about network security?

Your **network is more central** to your business processes than ever before. Bandwidth utilization, wireless connectivity, network segmentation, and network security are essential to your company's level of productivity. An unreliable network means your **business can be severely impacted**. A resilient network is essential for users to retrieve information quickly and communicate more effectively.

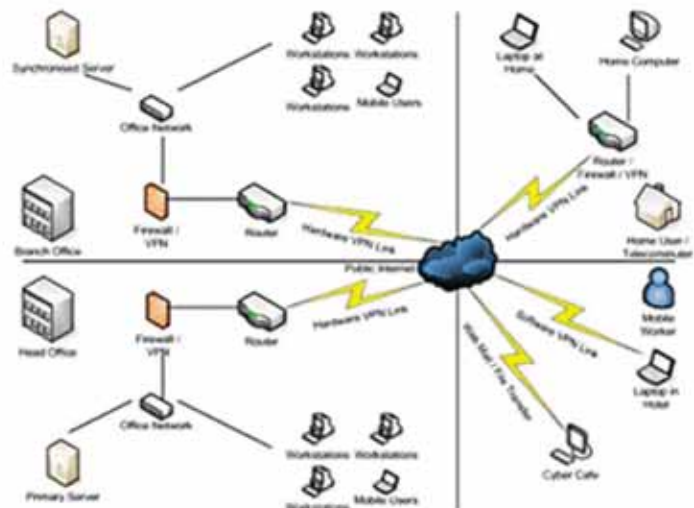

Our Expertise

The IT Solutions, Inc. team is composed of experienced, certified engineers with specializations ranging from LAN/WAN design to network security, wireless assessment, and related technology implementation.

Our engineers routinely handle:

- Network Services, Management, and Security
- Firewalls, Routers, and Switches
- Web Filtering and Web Security Installation
- Wireless Connectivity
- Secure Remote Access Solutions
- WAN Infrastructure
- Network Redundancy and High Availability

IT Solutions, Inc. engineers support existing networking infrastructure and can design and develop new network strategies based on proven technology solutions. We address multiple network infrastructure needs; customized to your specific situation. Let **IT Solutions, Inc.** handle the technology so that you can focus on what you do best, your business.
